

Sparse Optimization and First Order Methods: Recent Researches

Ryota Iwamoto

September 12, 2024

In 2024, Teboule, Cohen, Luke, Pinta, and Sabach proposed a new method: a Semi-Bregman Proximal Alternating Method (SBPALM) for a class of nonconvex problems [1]. This algorithm is a revised method of Proximal Alternating Linearized Minimization (PALM) method, which is a first order method for nonconvex-nonsmooth optimization problems [2]. In 2018,
